General Data

- Headquarters: Waregem – Belgium
- Affiliates all over Europe
- B2B in process and drinking water application
- B2C – POU / POE applications
- Turnover: € 155 million
- 780 employees

Water Treatment

Water dissolves everything: calcium, iron, salts, minerals, nitrates, ... These substances can be harmful for our health or for our production process.

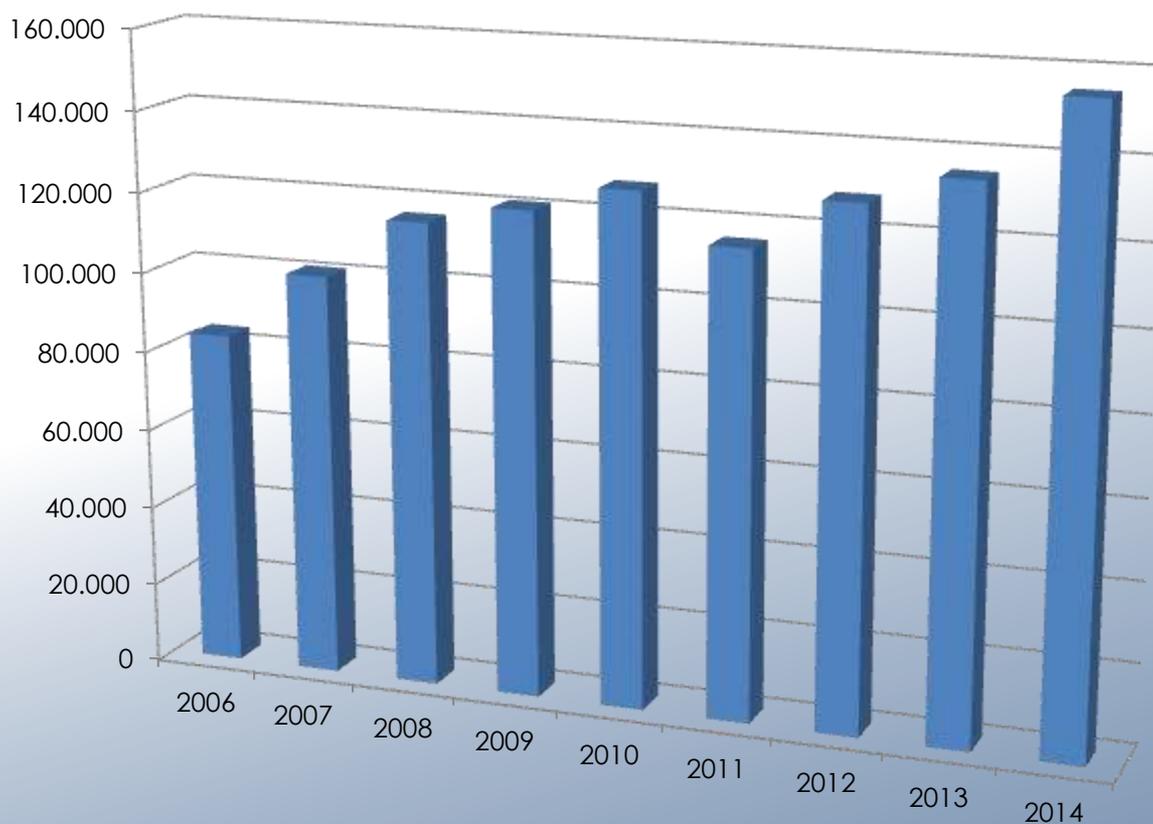

A laundry service can't use water that contains iron, If so, the laundry will turn yellow. With PWG installations we extract these components from water.

*It's what we call...
process- and drinking water treatment*

Turnover

Mission

- To be the reliable manufacturer and distributor for professional B2B partners in water treatment
- To be the expert in water treatment, delivering total solutions
- To deliver added value by means of knowhow and service

PWG's support

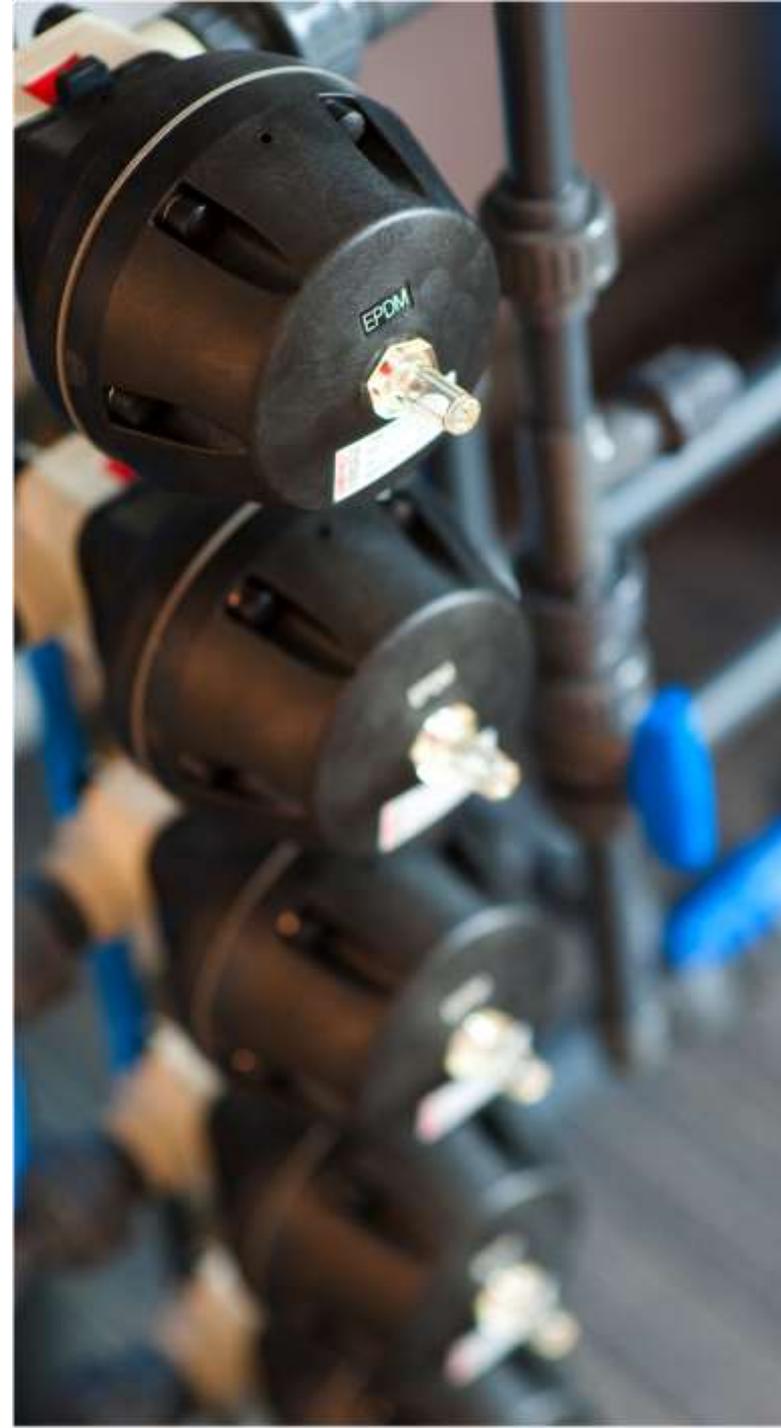

- IT Department (Microsoft Dynamics)
- Bookkeeping
- Financial Department
- Legal Department
- Marketing Department
- Centralised Purchase Department

Strengths

- Over 35 years experience in water treatment
- In house knowhow, design and production
- Tailor made solutions according to the required specifications
- Fast and reliable services
- One-stop-shop
- European distribution network

Scope of activity

- Types of water treatment:
 - Tap water
 - Well water
 - Surface water
 - Sea water
- Techniques mastered
 - Softening
 - Iron/manganese removal
 - Filtration (sand, activated carbon,...)
 - Ultra filtration
 - Reverse osmosis
 - Sea water desalination
 - EDI and mixed bed
 - Haemodialysis

Leading the Market

- Establish some partnerships with suppliers to come with customized solutions to the market. Avoid 'me too' strategy as much as possible
- Introduce successfully new technologies on the market with first rank suppliers
