

Dear Sir or Madam,

today we send you the second **DWA**-Newsletter for 2015 with new products and news of dialysis and **DWA**-family.

We hope you enjoy reading!

Kind regards

i.A. Selina Gözl  
Manager Commercial Marketing & Controlling

## **DWA Congresses**

### **ERA-EDTA London**

This year's ERA-EDTA congress in London was again very successful for DWA.

We met most of our distributors and could present our new products „modula TP“, „HemoRO 4 ONE“ as well as Data Visualization “Connect”. The HemoRO 4 ONE” will be available on first quarter of 2016 and the modula TP will be available on second quarter 2016.

### **CSN China / CANNT Canada**

We will exhibit our systems on CSN in China and CANNT in Canada on our distributor's stands.

At the CSN in China a large part of the available DWA systems can be presented. At the CANNT our heat-disinfection system “HDS” as well as a prototype of the heat-disinfectable single reverse osmosis system “HemoRO 4 ONE” will be shown.

## **DWA Products**

### **Data Visualization Connect**

As of July *Connect* is available for our new systems. *Connect* is a 10” Touchscreen panel PC for wall mounting and it displays the live view of the system. This includes the systems status of the complete water treatment system. Display of relevant parameters such as conductivity, flow, etc. as well as upcoming messages. Data can be recorded either in tabulated results or in graphic presentation and trend lines for important parameters.

Currently this system is available for reverse osmosis system „nephRO TP“ and heat-disinfection system „HDS“ with compatible RO system. For the remaining systems *Connect* will be ready on the last quarter of 2016.

## **DWA Projects**

### **Large-scale project Antwerp almost finished**

The large-scale project of Bellco Belgium in Antwerp is almost finished. System engineering, media supply systems as well as ring-mains for permeate and concentrate has been installed successfully.

Approval will be in the next weeks.

After winning the second large project in Belgium by Bellco we can start working soon. We are very glad our products are well received in the Belgium Market.
