## **UVO3 & MAKA: Two new acquisitions for Pollet Water Group**

**WAREGEM – The Pollet Water Group is proud to announce it has added 2 new companies to its rapidly expanding group. MAKA Wasser Gmbh (Switzerland) became part of Watertec, a PWG company at the end of December 2016. The take-over of UVO3 was finalized end of January 2017. Both acquisitions fit in the strategy of PWG to solidify its position as a water treatment specialist.**

Located in the UK, UVO3 Ltd are specialists in UV disinfection and water treatment. UV water disinfection is a commonly used technology that leaves no taint, chemicals or residues in the treated water. Disinfection using UV light is quick and clean and no bacteria, viruses or moulds are immune to the killing power of UV. UVO3 will be a separate operation for PWG in the UK, working alongside the existing PWG companies. The resources of PWG will help UVO3 to grow and to develop new products and new markets for UV technology. PWG on his side adds valuable experience in the growing market of UV.

MAKA Wasser Gmbh (Switzerland) is active in the distribution of water solutions to various types of clients such as offices, medical institutions, hospitals, authorities and corporate clients. The products of MAKA include bottled spring water, different kinds of water dispensers as well as hygiene and cleaning services. Apart from the link with water, Maka has a different market approach and product portfolio. Therefore, it is an enrichment for the Pollet Water Group.

For Pollet Water Group (PWG), the knowledge and experience of UVO3 & Maka, are great added values for the group in our aim to improve the quality of life and the efficiency of your processes through a network of specialized water treatment companies.
